

ACCU-FIT SAFETY RAILING

When building aesthetics are as important as addressing fall protection needs, the Accu-Fit Railing System offers many enhanced solutions. Accu-Fit Railings offer clean sight lines, upscale styling, non-penetrating design and are assembled right on-site to ensure an accurate fit that maintains a uniform appearance throughout the installation. All this while being fully OSHA compliant.

Review some of the options available and see why the Accu-Fit Railing System just may be the perfect answer you've been looking for at your university, hospital, corporate headquarters, or other high visible rooftop.

ACCU-FIT TRADITIONAL SERIES

Our Accu-Fit Traditional Series railing system features vertical stanchions that evoke both strength and style. Vertical and horizontal contours of the railing deliver crisp contours that accentuate and compliment building lines.

All Accu-Fit railing systems are constructed from 1½" hot-dipped galvanized schedule 40 pipe. Perhaps the best part is that the Accu-Fit railing system is completely free-standing. Our weighted base system provides the necessary counter-balance required to meet and exceed the OSHA load rating these systems must comply with.

- Straight stanchions
- OSHA compliant
- No roof penetrations
- Galvanized finish standard
- Custom colors available
- Up to 10' stanchion spacing

Rubber pads on the base plates **act as a barrier** between the base and sensitive roof surfaces.

ACCU-FIT ARCHITECTURAL SERIES

The Accu-Fit Architectural Series railing system features curved stanchions that present a swept-back profile enhancing the appearance of the roof line making it look like an integrated aspect of the building.

The Architectural Series is available in a galvanized finish that blends in with most facades. Optional powder coat colors can also be added as a topcoat where blending in with the building coping or edge metal for a completely custom appearance is desired.

- Curved stanchions
- OSHA compliant
- No roof penetrations
- Galvanized finish standard
- Custom colors available
- Up to 10' stanchion spacing

Architectural Series railings offer **reduced visibility from street level** while maintaining a high degree of safety and compliance on the roof.
