# HOW WE **PROTECT** YOUR PEOPLE

(AKA CAPABILITIES)

## **Comprehensive Fall Protection Systems**

From personal fall arrest equipment to engineered guardrails and anchorage solutions, EDGE provides a full range of products designed to meet stringent safety standards.

## **Custom Engineered Solutions**

Every workplace is unique. Let our in-house engineering and drafting team build a solution for you.

## **Training & Certification Programs**

Safety isn't just equipment — it's knowledge. We offer hands-on training and certification to empower your workforce with the skills needed to work confidently at heights.

## **Inspection Testing & Maintenance Services**

Regular inspections and maintenance ensure your fall protection systems perform optimally. EDGE provides professional audits to keep your equipment compliant and reliable.

# YOUR SAFETY. OUR EXPERTISE.

A photograph of a rooftop HVAC unit with yellow safety railings. The unit is a large, grey, rectangular box with multiple vents. The railings are bright yellow and form a safety barrier around the unit. In the background, a city skyline is visible under a clear blue sky. The foreground shows a white, perforated metal surface, likely part of the rooftop structure.

EDGE Fall Protection serves U.S. companies committed to occupational safety. EDGE delivers authoritative, integrated solutions that ensure absolute compliance and protection for employees at heights. Unlike large corporations focused solely on profits, EDGE sets the standard for safety—giving you the control, consistency, and confidence your workforce deserves.

*"I had a great experience dealing with EDGE Fall Protection. They made the entire process very easy for me. We needed fall protection rails installed on a School project and the end result was better than I had hoped for. The District and project engineer are very happy with the product and workmanship. Thank you for a job well done!"*

— Darin A, B & I Contractors

# THIS IS WHO WE ARE

At EDGE, we believe that working at heights should never mean risking lives. Every worker deserves the right to climb, build, and perform with confidence—knowing they are protected every step of the way.

We refuse to accept safety as a checkbox or an afterthought. Where others see regulations, we see responsibilities. Where others chase profit, we choose people.

We exist to set the standard—clear, uncompromising, and unshakable. Because safety isn't just a promise. It's leadership. It's care. It's control where chaos could exist.

Our solutions are not off-the-shelf. They are integrated, intentional, and designed with one purpose:

- To protect lives.
- To empower companies to rise higher without fear.
- To ensure that every worker returns home safely—every day, without exception.

At EDGE, we don't just keep people safe: We elevate trust. We elevate responsibility. We elevate life above all else.
