

# ACCUFIT MODULAR RAILING

AccuFit Modular Railings are made of malleable iron and are designed to make the building of handrails and pipe structures fast and easy. Using only simple hand tools, complex pipe configurations can be produced quickly and efficiently. When you use AccuFit Modular Railings, assembly is intuitive. Fittings slip on the pipe, and the stainless steel set screws can be tightened using a simple hex wrench.

AccuFit applications include handrails, guardrails, greenhouses, displays, racks, safety barriers, playground equipment, store fixtures, boat docks and more! There is no welding and structures are easily reconfigured if your design changes.

With easy ordering, friendly expert service, and quick shipping, you can get started on your pipe project in no time. AccuFit fittings are durable enough for industry yet simple and cost effective enough for the home hobbyist.

AccuFit fittings are stocked to fit schedule 40 pipe sizes 1 inch through 1½ inches. All fittings come with stainless steel set screws as standard and are priced and sold in pairs.

## ACCUFIT FITTINGS

**Series 1047**  
90 Degree Elbow

**Series 1048**  
Short Tee

**Series 1049**  
Long Tee

**Series 1050**  
Railing Base Flange

Hex Wrench

## HOW TO ORDER ACCUFIT FITTINGS

Select your fitting series number and use the pipe size chart to determine your fitting size. For example: to order a 90 Degree Elbow for schedule 40 1¼ inch pipe, your complete fitting part number is 1047.32. For 1½ inch pipe, your part number is 1047.40.

AccuFit pipe size	32	40
Nominal pipe size*	1¼"	1½"
Pipe OD	1.660"	1.900"
Fitting ID	1.730"	1.970"

\*The nominal bore varies with the thickness of the pipe.
